

Water Resources Management Plan 2014

Final Plan June 2014

Rocfort Road
Snodland
Kent
ME6 5AH

Contents

Executive Summary	7	Section 3: Supply Forecast	43	Section 6: Supply Demand Balance	77
Section 1: Overview	13	Introduction		Introduction	
Introduction		Determining the water available for use		Comparisons with WRMP09	
Linkages to other programmes		Overall starting position			
Introduction to South East Water		Changes to the water we will have available to use in the future		Section 7: Optioneering	83
Our overall approach		Overview of water available for use		Introduction	
Challenges and opportunities				Appraisal objectives	
What we have achieved since WRMP09		Section 4: Demand Forecast	61	How we have engaged on our options appraisal process	
Environmental and social responsibilities		Introduction		Overview of option identification and appraisal process	
How we have prepared our draft Water Resources Management Plan for 2015-2040		Water efficiency		Option appraisal: Summary	
Plan assurance		Preparing the forecast		Section 8: Developing Our Preferred Plan	91
Water resources planning tables		Our starting point		Introduction	
Section 2: Engagement	33	The base year starting position		WRSE modelling for WRMP14	
Introduction		Population and properties		Our modelling for dWRMP14	
Statutory requirements for Phase 1 consultation		Per capita consumption		Risk assessment	
Phase 1 engagement activities		Our customer metering programme		Long lead in times	
Phase 2 engagement activities		Non-household demand		Engagement and customer preferences	
Phase 3 engagement activities		Baseline leakage		Strategic Environmental Assessment and Habitats Regulations Assessment	
Conclusions		Peak factors		Determining our preferred plan	
		Overview of demand forecast		WRSE Phase 3 modelling	
		Baseline forecast demand			
		Section 5: Target Headroom	73		
		Introduction			

Section 9: Our Preferred Plan **101**

Introduction
 Components of our preferred plan
 An estimate of costs
 Comparison of the preferred plan options to WRMP09
 Does the preferred plan meet our objectives?
 Alternative options
 Next steps: our work for the period 2015 to 2020
 Overall conclusions

Section 10: Assurance **119**

Introduction
 Overall plan assurance
 Specific assurance on investment option costs
 Concluding statement

Glossary **123**

Technical Appendices

Appendix 1: Overview
 Appendix 2: Engagement
 Appendix 3: Supply forecast
 Appendix 4: Demand forecast
 Appendix 5: Headroom
 Appendix 7: Optioneering
 Appendix 8: Developing our Preferred Plan
 Appendix 9: Our Preferred Plan

Note: There are no Technical Appendices for sections 6 or 10.
